

AuditMatic®

Manufacturing Solutions

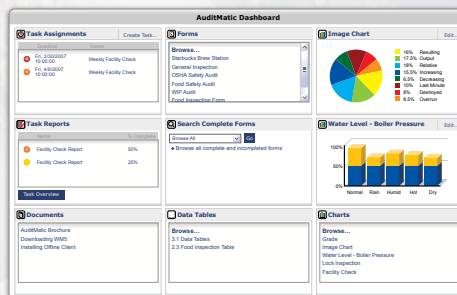

Throw away your clipboard and pencil.

View and report in real time from anywhere.

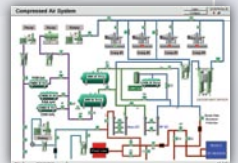

AuditMatic compiles collected field data into meaningful charts and tabular reports viewable by authorized users from their Internet-connected desktop web browser or within their own SCADA/HMI system.

Watch charts and reports update immediately as mobile workers submit their data.

Integrate with your plant control systems

Data from AuditMatic's SQL Server database can be shared with your HMI, DCS or SCADA system via XML, CSV or OPC interfaces.

Collect the data you want, when you want, the way you want.

AuditMatic allows field workers to use rugged PDAs, web browsers, or smart phones to receive their tasks and collect vital field intelligence. AuditMatic handheld software has been designed to operate without a continuous Internet connection. Users can operate just about anywhere inside or outside your facilities.

Hosted Solution

AuditMatic runs on our servers and is accessed over the Internet. There is no software to purchase or servers to maintain.* FAS will set up your own AuditMatic website enabling you to start collecting data quickly and easily.

* AuditMatic also works with Enterprise customers who want to purchase and host their AuditMatic system.

Make informed decisions and act quickly.

Rapid field intelligence reduces reporting turn-around time to minutes rather than days or weeks. AuditMatic can enhance data gathering by adding new elements to reports, including images. With AuditMatic, management can act quickly to increase production, respond to recurring issues, protect brand integrity and share best practices throughout the enterprise. In business, what you don't know can hurt you.

DIY—No programmers need apply.

AuditMatic is designed for non-IT users to setup and manage. No programming knowledge is needed. Simply access the intuitive web-based AuditMatic Manager from a web-browser to organize users, publish forms, assign tasks and view and share data in real time.

Inherently Efficient

AuditMatic enables companies to save time and money by eliminating transcription and report-generation labor associated with legacy paper or spreadsheet data-collection methods.
