

# Proficy\* DataMart

Powerful intelligence in the plant and across the enterprise

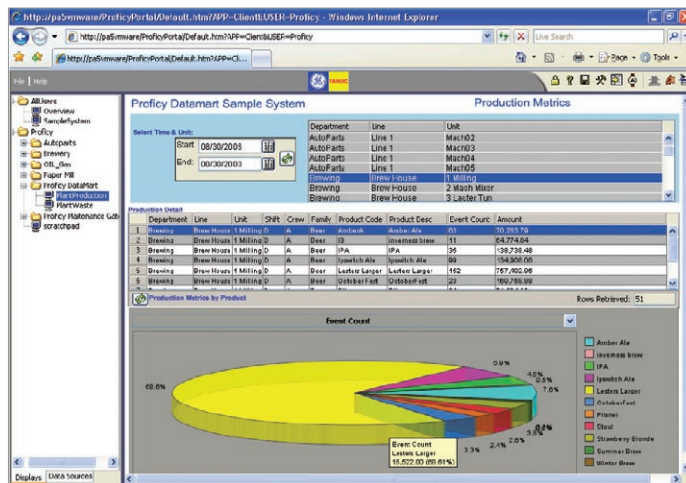

## Capabilities

- Enterprise information delivery
- Powerful ad-hoc reporting and analysis
- ETL transformation of data
- Open standards connectivity
- Microsoft OLAP technology
- Multiple time-zone support

Proficy DataMart reaches deep within your operations and across your business to provide a single, unifying view into your operational performance. Its powerful data cubing technology layers on top of the Proficy Plant Applications suite of software modules, taking the already powerful reporting and analysis capabilities of Proficy to new levels – in the plant and across the business.

## Real-Time Analysis Cube of Proficy Software

puts your information in a form you can understand by leveraging your naming conventions, metrics and calculations – enhancing the ad-hoc reporting and analysis capabilities for Proficy Plant Applications users while exposing everything to Proficy Portal, Microsoft Excel and SQL Reporting Services for extended visualization and reporting.

A platform for Plant & Enterprise Manufacturing Intelligence reduces the time, cost and complexity of developing sophisticated ad-hoc reports and analyses to complement the hundreds of existing reports, views and analysis tools within Proficy Plant Applications. And, Proficy DataMart fits within your existing Business Intelligence initiatives, supplying access to the real-time, contextualized production information vital to your strategic and operational success

Multi-Server, multi-time zone, multi-language capabilities support your operations around the clock by connecting to multiple Proficy sites locally, regionally and around the world.

## Enhances existing deployment platforms

by removing the need to understand the production database schemas and leveraging your existing Business Intelligence infrastructure. Proficy DataMart exposes production information to fit directly into your Data Warehouse and Enterprise Performance Management strategies.

## High-Performance, Enterprise-Wide Architecture

delivers real-time, mission-critical data by leveraging the robust Proficy solutions and technologies proven throughout industry world-wide.

Proficy DataMart delivers easy access to relevant production information across all the production environments and sites using GE Fanuc's Proficy Plant Applications Software – providing meaningful context to the production and process data by turning bits-and-bytes of real-time data into meaningful intelligence about orders, assets, production, quality, yields and more. And, it does so without you having to touch the database or know anything about the database schemas.

# Proficy\* DataMart – Powerful intelligence in the plant and across the enterprise

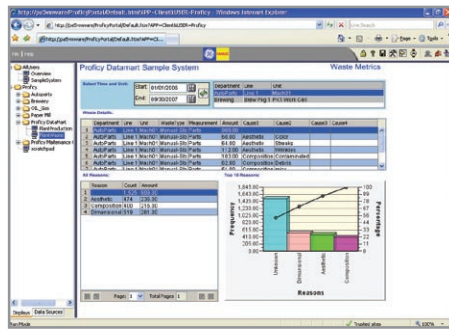

## Proficy DataMart

- Integrated with GE Fanuc's Proficy Production Management Software applications

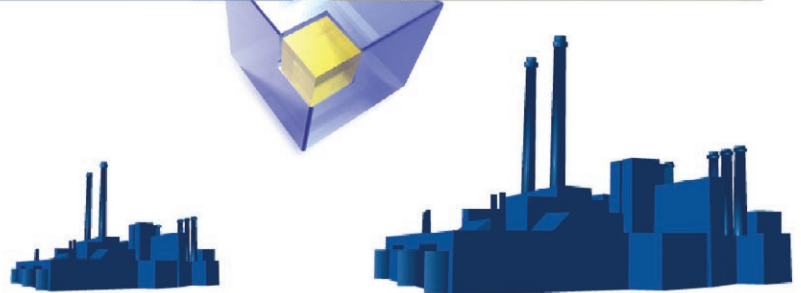

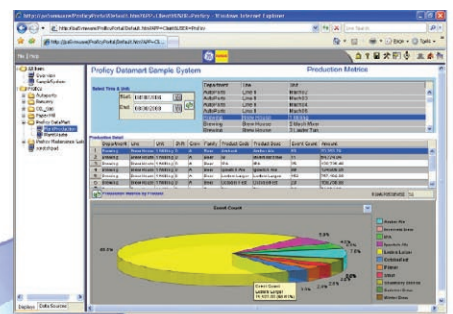

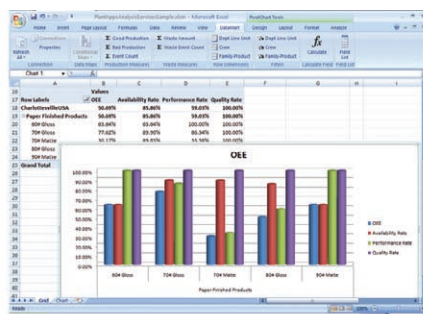

**Proficy Plant Applications:** enhanced capabilities for ad-hoc and complex reporting and analysis of production, product and process information in the plant or across the enterprise

**Proficy Portal:** visualizes site or enterprise performance information side-by-side with all the other production, quality, maintenance and control information captured within your plant portal

- Advanced architecture supports multiple servers, time zones and languages to support the broad range of production environments present in typical global companies
- Open & Layered architecture extends the value of existing plant systems by layering advanced reporting and analysis capabilities on top of existing Proficy Plant Applications infrastructure
- Puts the proven results of Proficy Plant Applications across a variety of industries in more than 34 countries globally even closer within your reach:
  - \$4,000,000 operating savings in year 1  
*Paper producer*
  - 25% decrease in defects  
*International glass manufacturer*
  - 10% increase in OEE  
*Food & Beverage company*
  - Elimination of overruns  
*Major global brewer*
  - 20% decrease in inventory  
*Global CPG company*

Proficy DataMart gives you an Enterprise Manufacturing Intelligence solution that unlocks the power of existing production data across your operations and presents them to your business intelligence and performance management systems.

Proficy DataMart provides a high performance analytical platform scalable from one to many sites that empowers performance benchmarking within the plant and across the enterprise.
