Question:

How do I Extract license data from GE's Advantage licensing client?

Answer:

To generate a file that contains all your specific license details, follow these easy steps:

- **Open the License client**
- **In the upper right hand of the license client, click the Advanced tab**
- **From the Advanced tab, select option #5 (Create Reports)**
- **Click #1 to save the report as a file, and browse for a good place to save it.**
- **You can open the file with notepad, and it will give you the date that the report was created on, as well as the device ID the key was activated on, and your customer info, license number, etc.**
